Sama Mohamed

Angular Developer

Cairo . Egypt   +20 1020970851   www.linkedin.com/in/sama-mohamed2   sama21mohammed@gmail.com

OBJECTIVES

Entry-level developer skilled in JavaScript, Angular, Node.js, and MongoDB. Eager
to apply modern practices to build scalable full-stack applications.

EDUCATION

Bachelor of Computer Science, Luxor University, Egypt

Faculty of Computers and Information, Information System Department

Expected Graduation Date: 2026

GPA: 3.2

EXPERIENCE

Oct – June   Angular Development Trainee

(2024-2025)   Digital Egypt Pioneers Initiative (DEPI), Egypt

- Developed **3 projects** using **HTML, CSS, Bootstrap, and JavaScript**, ensuring responsive and user-friendly designs.
- Executed tasks using **Angular**, including component creation and dynamic UI implementations.
- Continuously learning **Angular and Node.js** to enhance full-stack development skills.
- Currently working on a **Job Application Platform** as a **graduation project**, collaborating with teams specializing in **AI and Data Analysis** to build an integrated system.

July – Present   MEAN Stack Trainee – Full-Stack Web Development

2025   National Telecommunication Institute (NTI), Egypt
- Undergoing an intensive 210-hour training program focusing on MongoDB, Express.js, Angular, and Node.js.
- Working on a practical E-commerce project, implementing features like product listing, user login, shopping cart, and order tracking.

- Gaining hands-on experience in building full-stack applications, from database design to API development and front-end integration.
- Learning how to write clean, modular, and maintainable code using industry standards.
- Actively improving skills in application optimization and web security, including secure authentication, data validation, and performance tuning.
- Collaborating with team members to solve real-world problems and apply best practices in software development.

Technical Skills

- **Back-End:** Node.js, Express.js
- **Front-End Frameworks:** Angular, Bootstrap
- **Programming Languages:** JavaScript, TypeScript, C++
- **Tools:** Git , Github & Postman
